

PRO 2 3D printer (RAISE 3D TECHNOLOGIES)

The latest printer from Raise3D also includes improved extruder motors that are mounted with filament run out sensors. The Raise3D Pro2 includes a cooling fan with a HEPA filter, which traps over 90% percent of all contaminants and keeps dust and debris away from your prints.

Technical Characteristics

- Technique: FFF
- Print head travel speed: 30-150 mm/s
- Dual-head with electronic lifting system
- Build plate temperature up to 110°C
