

The Engler viscometer is used to determine the specific viscosity of tars and their products according to the ASTM D1665 standards, the viscometer is comprised of stirrer and thermometer, bench type, inner and outer pan are totally made of stainless steel. Digital temperature controller, features easy parameters setup and high accuracy.

#### **Technical specifications**

Standard water value:  $(51 \pm 1)$ s

Test temperature:  $(0 \sim 100)^\circ\text{C}, \pm 0.2^\circ\text{C}$

Receiving flask volume:  $(200 \pm 0.2)$ ml

Internal pan: stainless steel

Heater power: 550w (AC220v, 50hz)

Stop water: 0.01 s accuracy

Overall size: 1200mm×w200mm×h400mm (not include temperature controller)
